Dear Penny,

Thank you for supporting Warwick Medical School students during their Phase 2 placements.

The students are asked for their feedback at the end of each block and we wanted to share with you how much the students have enjoyed their time at Kenyon Medical Centre.

**“Offered us a wide range of patient encounters got us face to face consultations every week, were very considerate of our learning outcomes. Tried to teach us from every consultation and had us sit with many different people to understand their roles. Timetable well managed and good communication on changes”**

**“Enthusiastic doctors who are passionate to teach - Lots of patient exposure to aid our learning”**

**“Lots of patient contact, much more than the required 3 per day. Excellent experience with difficult patients but well supported by the GPs there”**

**“The GP practice great. The placement has been really well organised by Dr Hastings and we have been given lots of opportunities to see different HCPs and varied patients. The student led consultations have been useful in getting to grips with a slimmed down consultation process that is more realistic”**

**“The twenty-minute consultations are very useful, and our GP is aware of what we are meant to achieve during our time here”**

Please pass on our thanks to all of the GPs and practice staff who made the placement such a positive experience.

Kind Regards,

Natasha Murat
